How the order form works:

- To complete the Requested Order for a product you must have first entered the Stock on Hand for that product.
- The Suggested Order will populate once you have entered your Stock on Hand, some products have been set up not to suggest an order this will be noted under Current Alert.
- The Suggested Order comes from your individual account's ordering history. It looks back at what has been ordered of that product in the last 12 months and works out a monthly average, it then subtracts what you currently have in stock.
- We have rules set up in the background, if your order does not meet these rules it will be flagged to Onelink to review they may approve the order or contact you to discuss.
